

CLAIMS – I claim:

1. That the spacer plate of Aculite glass, of different transparent colors sandwiched by motor vehicle license plate mount and license plate of the same size, will illuminate its edge by natural and electrically-required license plate light.
2. The illumination of said spacer plate edge in Claim #1 shall occur by the polished effect of said spacer plate edge.
3. The said spacer plate of Claim #1 is drilled through for mounting different dimensions of motor vehicle license plates of various sizes whereby license plate is mounted.
4. Thickness of transparent colored edge of said spacer plate of Claim #1 shall vary whereby effects will differ.
5. The size of drilled mounting holes of said spacer plate of Claim #3 shall vary in conjunction with size of motorized vehicle license plate mounting holes and distance.
6. Said spacer plate of Claim #2's illumination will occur by sandwiching said spacer plate.
